
Vegetable Cowpea Variability Genetic Estimation Parmar

genetic variability assessment in vegetable cowpea [vigna ... - keywords: vegetable cowpea, variability, heritability and genetic advance introduction cowpea [vigna unguiculata (l.) walp.] is an annual, autogamous leguminous vegetable crop of india belongs to family leguminosae (mackie and smith, 1935) [1] with a chromosome number of $2n=2x=22$ (darlington and wylie, 1955) [2]. **estimates of genetic variability, heritability and genetic ...** - vegetable cowpea were evaluated to estimate variability, heritability and genetic advance over mean for pod yield and component characters. analysis of variance revealed significant differences for almost all the characters studied. high genotypic coefficient of variation was **genetic variability and heritability of some selected of ...** - kano, nigeria screen house to estimate the genetic variability and heritability of some traits in selected cowpea lines. results of the study showed that there were considerable variations among the lines for duration of vegetative and reproductive phase and for yield characters (seed/pod, number of pod/plant, weight of pod/plant, and 100 seed **study of genetic variability, heritability and genetic ...** - are ample opportunities for cowpea to develop into a most popular vegetable crop made available throughout the year. the genetic variability study helpful to estimated studies on genetic variability, heritability and genetic advance were carried out with thirty genotype of cowpea [vigna unguiculata (l.) walp] for 16 traits. **e-issn: estimates of genetic variability, heritability and ...** - keywords: vegetable cowpea, heritability, genetic variability, genetic advance introduction vegetable cowpea [vigna unguiculata ssp. sesquipedalis (l.) verdc.] is a distinct form of cowpea grown as a vegetable crop in southern asia and far east for its immature pods. being a legume crop, cow pea fits well in inter-cropping system. **genetic variability, heritability and genetic advance in ...** - key words : genetic variability, heritability, genetic advance, cowpea. cowpea [vigna unguiculata (l.) walp] is an important vegetable crop, which is gaining popularity among the farmers due to various uses such as food, fodder, vegetable and organic manure for soil fertility restoration as well as its ability to grow well throughout the year. **ijasr - genetic variability studies in cowpea vigna ...** - genetic variability studies in cowpea (vigna unguiculata l. walp) sarath p. s. & reshma. t kerala agricultural university, vellanikkara, thrissur, kerala, india abstract genetic variability, heritability, genetic advance and genetic advance as per cent of mean for twelve characters **variability and correlation studies in cowpea (vigna ...** - cowpea [vigna unguiculata (l.) walp] is an important leguminous vegetable crop mainly grown both in kharif and spring summer season crop in most parts of india. cowpea is diploid with chromosome number of $2n = 22$ cowpea belongs to family leguminaceae, sub family fabaceae, is a genus having 170 species.. cowpea contains three cultivated **nutritional composition of immature pods in selected ...** - information on genetic variability among genotypes is useful in crop improvement programmes. the study was carried out to determine the variability of nutritional composition in the immature pods of selected cowpea genotypes for use in breeding for nutritional qualities. **variability and genetic diversity in yard long bean (vigna ...** - genetic diversity of cowpea genotypes. results and discussion the variability and genetic divergence estimated in twelve yard long bean genotypes has been discussed below. mean performance of accessions analysis of variance revealed significant differences among the 12 genotypes of yard long bean for all the characters studied viz., **study of genetic variability parameters in f2 generation ...** - study of genetic variability parameters in f2 generation of interspecific hybrids in cowpea krishnaja r. nair*, desai s. s, sawardekar s. v and burondkar m. m department of agricultural botany, college of agriculture, dbskkv, dapoli *corresponding author e-mail: krishnaja1993@gmail **identification of selection indices and choosing of ...** - in the present study seventeen genotypes of vegetable cowpea (vigna unguiculata cv-gr. sesquipedalis) collected from different places in the country were evaluated for different horticultural traits for genetic variation, character association, cause-effect analysis and genetic diversity was measured among the genotypes through d2 statistics ... **correlation and path analysis study in cowpea (vigna ...** - correlation and path analysis study in cowpea (vigna unguiculata (l.) walp.) 1patel, u.v., 2parmar, v.k.*, 3patel, p.b. and 4malviya, a.v. 1,3,4department of ... **path analysis and heritability estimates of yield and ...** - vegetable cowpea are pod clusters/plant, pods/cluster trait was partitioned into genetic and non-genetic factors and pod weight [10, 11, 12, 4]. despite the importance of and estimated according to wricke and weber [14] and this nutritionally important vegetable legume there is prasad et al. [15]. **genetic variability, heritability and genetic advance in ...** - genetic variability, heritability and genetic advance in vegetable cowpea [vigna unguiculata (l.) walp] g.k. sapara, r.m. javia and m.v. pokar hind agricultural research and training institute summary studies on genetic variability, heritability and genetic advance were carried out with forty genotype of cowpea [vigna unguiculata (l.)
